

## A SUITE OF PROFESSIONAL SERVICES TAILORED TO YOUR NEEDS

Transitioning to enterprise-wide software such as Ocean's suite of training and operations management solutions requires careful consideration to meet each individual customer needs.

For 30 years, the Ocean team, comprised of ex-Defence and industry experts, have helped organisations across the globe design fit-for-purpose solutions, gather requirements, implement software and provide ongoing support that exponentially improves training throughput and operational efficiencies.

## OUR SERVICES

**Our mission is to help unlock the potential of your organisation's workforce in real-time so that you can make better decisions today, plan for tomorrow, and prepare for the future.**

### TRAINING

Even though training is generally provided at the time of installation, staff changes occur often, and long-term team members can benefit from refresher courses delivered in a variety of formats depending on your needs. Given the configurability and depth of our products, we also provide embedded consultants.

### CONSULTING DAYS

It's often challenging to determine the exact scope of services required to address an issue or solve a problem. Our experienced industry consultants are here to help you and will assist with troubleshooting and process discovery, training, and other services related to specific products, productivity, and processes.

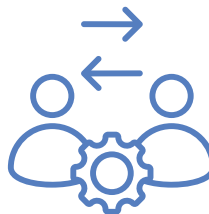

### CONSULTING

Our teams have considerable experience across domains and understand best practice across a range of disciplines. They can work with your cross-functional teams to fine-tune configuration and business processes to get the most out of the solutions implemented.

### DATA ANALYSIS & REPORTING

Our experienced team can quickly turn bespoke reporting requirements into a custom-built report. By providing deep analysis and insights on your training and operations data and provide forward planning with throughput recommendations.

### TAILORED APPROACH

If you have a specific need, we can design a particular services scope, including development and organisation-wide rollout of processes or managing the transition or integration from your existing system to Ocean's product suite.
