PLAN & MANAGE OPERATIONAL LOCATIONS IN REAL-TIME

Developed in collaboration with industry, ensuring that it meets the specific needs of the military and aviation environments, TAMS® (Task and Area Management System) is an airspace and location planning tool, providing a connected, real-time environment for Squadrons, Wing Ops, Control Towers, Air Operators and Command to book and de-conflict airspace and location requirements.

When integrated with FlightPRO®, TAMS® coordinates the daily flying programs of all squadrons and their location requirements, regardless of their geographic location.

As an **airspace manager or coordinator**, TAMS® provides you with an eagle-eye view and control of your airspace, ensuring efficient management and coordination of all air activities.

As a **supervisor**, TAMS® empowers you with robust oversight capabilities, enhancing your ability to supervise and streamline operations effectively.

As a **user**, TAMS® offers a user-friendly interface that simplifies your workflow and increases your productivity.

TAMS®

powered by ocean.

TAMS® PROVIDES AN INTUITIVE METHOD TO PLAN, SCHEDULE AND DE-CONFLICT BOOKINGS FOR THE USE OF AIRSPACE

Forward Planning

Secure Communication

Real-time Collaboration

Command Level Awareness

ENHANCED OPERATIONAL EFFICIENCY

TAMS® efficiently manages airspace and base locations, enabling maximised use of shared locations, reducing operational costs. The software streamlines planning and scheduling, leading to more efficient operations.

COLLABORATIVE PLANNING

View and book airspace and associated resources, driven from a live database, networked across geographically dispersed locations. All stakeholders connected, military or non-military have real-time awareness, supporting the Flexible Use of Airspace concept.

ELIMINATE PAPER-BASED SYSTEMS

A paperless workflow allows you to realise significant efficiency gains. Visual reporting and a comprehensive audit trail allows you to optimise your operations. Streamlined communications across units and support agencies frees up time for aircrew, schedulers and staff to focus on high value tasks.

SUPPORTED, SCALABLE & SECURE

Ocean Software is dedicated to supporting customers through every step from implementation to maintenance, ensuring the system operates optimally. TAMS® is scalable on private and public cloud infrastructure and provides secure access controls.
